Session I Barbeque Skewer

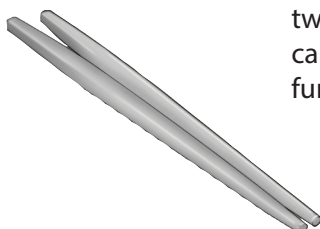

Material: 18" of 1/4" square stock

Description: A simple skewer, with one end brought to a short, controlled, and sharp taper. The other end will be turned into a round eye of approximately one inch in diameter. I am looking for a centered eye and a short taper, so pay attention to the details.

Session II Forged Pendant

Material: 3" of 1/2" x 3/16" flat bar

Description: A small pendant, bent to a uniform curve, with a hot-punched hole on either end for a necklace-cord to be threaded through, as shown in the picture. I'll be looking for a uniform bend and cleanly punched holes.

Session III Pair of Chopsticks

Material: 10" 3/8" round bar

Description: A bar, with a round taper on each end, hot cut in two to make two even and usable chopsticks. Go slowly, go carefully. I'm looking for control and straightness, as well as functionality.
