

# Division 3

a working blacksmith

Side Profile

## Session I

### Fairy Circlet

Material: 48" of  $\frac{1}{4}$ " round

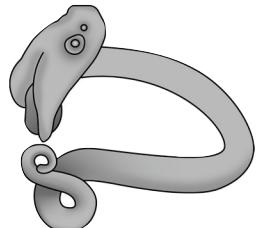

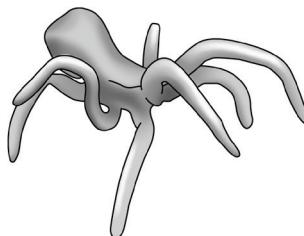

Description: This one's simple, but also not entirely so. You have 48" of  $\frac{1}{4}$ " round stock. Taper it, texture it, forge-weld it, bend it. Uneasy should not be the head that wears a crown. Please. I'd like to have both of my eyes and my skull intact after testing.

## Session II

### Spider Queen

Material: 6" of  $\frac{1}{2}$ " square bar

Description: Cut, folded, forgewelded, posed. I hope you're not an arachnophobe. I'm looking for a clean, simple form that is clearly a spider, rather than an octopus.

## Session III

### Bracelet Dragon

Material: 18" of  $\frac{3}{8}$ " Square bar

Description: Everyone needs an adorable little dragon to wrap around their wrist in stressful situations. Cute little dragon face, cute little snakey body, wraps comfortably around the forearm. I want to be able to see the face while I'm wearing it. This one is all details, details, details.
